

Clean Room Manufacturing

DS Smith's purpose built 'Clean Room' manufacturing facility is located alongside its existing box making plant at Wellingborough Northants.

The facility has been built to satisfy the needs of discerning customers in the Food, Pharmaceutical and Hi-Tech Electronics sectors that require complete control, hygiene and traceability throughout their supply cycle.

Hygiene

Every aspect of hygiene has been addressed in the new building, from strict procedures for our operators, down to specialist mats integrated within the concrete floor at the factory entrance to ensure fork lift truck wheels do not contaminate the production area.

Raw Materials & Accreditations

Corrugated board converted in our 'Clean Room' facility is supplied from our sister factory at Kettering, also in Northants. Accreditations include FSC (Forest Stewardship Council) and the Carbon Trust standard. Both facilities hold the BRC/IOP 'High Risk' Global Standard for packaging materials. Speciality papers from DS Smith Kettering are incorporated into our corrugated board combinations and are suitable for direct food contact.

Markets

This facility is ideally suited to serving the needs of the Food, Pharmaceutical and Electronics sectors, along with any other packaging customers that value the high standards of hygiene and traceability we provide.

Our UK Sheet Plants

The Clean Room Manufacturing operation at Wellingborough is just one of 12 DS Smith Sheet Plants across the UK.

There are a further 18 main plants (with corrugators) so we are in the unique position of being able to supply all your corrugated packaging requirements, be they 'clean room' standard, traditional conventional corrugated, high quality display or Heavy Duty Industrial packaging.

Sustainability

In line with the company's commitment of carbon reduction, the new building at Wellingborough incorporates 192 solar panels which will generate sufficient energy for 50% of its own needs.

The building itself has a Class Leading 'A' standard insulation value.

The UK's Leading Supplier of Corrugated Packaging

DS Smith operates in over 20 countries and employs around 22,000 people. Using the combined expertise of our four divisions – Packaging, Recycling, Paper and Plastics – we work with customers to address wide ranging topics, reduce complexity and deliver results throughout the Supply Cycle.

For more information, visit **www.dssmith.com**

DS Smith is the UK's leading supplier of corrugated packaging. Our comprehensive product range includes retail ready packaging, transit cases, consumer units, packs printed for gift and POS applications, and heavy duty packaging for industry. DS Smith's national network of manufacturing plants service thousands of customers, from multinationals to local businesses.

Using PackRight®, our unique way of working, our highly-skilled people work closely with customers to specify packaging that achieves real results. Typically, our customers achieve sales growth, or reductions in cost, waste and carbon at every stage of the Supply Cycle.
